

# Handheld plus

### Wall or Cab Mount Bracket

available for handheld

**SP Crosby**  
Part Nos.  
**SU3282**  
**2789228**

### Rugged Rubber Boot

available for handheld

**SP Crosby**  
Part Nos.  
**SU4045**  
**2789232**  
See page 27

## Features and benefits:

- Displays up to 4 load cells simultaneously
- Wireless range 1000m or 3280ft
- Low battery warning
- Signal strength warning
- Overload counter
- User settable 90db audible overload alarm
- Multiple display units – tonnes, lbs, kg and kN
- 200Hz Peak hold

The Handheld plus is a rugged and versatile digital handheld display with an extensive range of features and suitable for all Crosby | Straightpoint load cell products.

At the heart of the ergonomically designed SW-HHP is a powerful PCB, designed in-house, which brings the user a multitude of specifications that aid in improving work place safety. One of the latest enhancements that Crosby | Straightpoint provides is the ability to connect with, and monitor up to, four different loadcells simultaneously. This will provide a single-point screen source to monitor the measurement of the load lift and totals in real-time.

This in-built technology also allows the user to not just monitor telemetry signal strength between the handheld and the loadcell(s), but monitors the battery level of each load cell in real-time as well. In order to maintain the accuracy of the loadcell the SW-HHP will automatically provide you with an alert of when the calibration validity period has expired.

The user is also able to select units of measure (tonnes, lbs, kg and kN), programmable 90db audible overload alarm and a 200Hz peak hold.

This crucial overload alarm counter is a requirement for many safety and quality control departments, as it keeps track of overload events, allowing the load cell in question to be removed from service immediately, following the calibration voiding overload event.

The HHP is suitable for connection via cable to any Crosby | Straightpoint cabled load cell product and easily adapted to any other manufacturers' load cell product with a mv/v output.

In addition to the standard HHP the SW-HHP is suitable for connection to any Crosby | Straightpoint wireless load cell, has a telemetry range of up to 1000m or 3280ft and is supplied as standard with the Radiolink plus load cell.

Also available with hazardous area approval

**ATEX / IECEX**  
Ex ia II C T4 Ga

Certification number:

**SW-HHP ATEX**  
IECEX SIR 15.0072X  
Sira 15ATEX2196X

**When ordering ATEX/IECEX version of SW-HHP, order using code: SW-HHP-ATEX**

**Please note:**  
There is no audible alarm with ATEX
