

Light measuring instrument for precise light measurement up to 200,000 Lux

Features

- Measures illumination in the workplace
- Helps to determine whether a workstation has insufficient light or whether there is too much light
- · Photo sensor: silicon diode
- Cosine correction for angular incident light
- Sturdy protective cover for the photo
- · Increased service life: Impact protection by means of a protective casing
- III Delivery in a robust box
- · Track function for continuous recording of changing environmental conditions
- Peak Hold Mode to capture peaks
- · Selectable measuring units: fc (foot-candle), lx

Technical data

- Measuring frequency: 2 Hz
- Cable length (Photo sensor) approx. 1 m
- Dimensions W×D×H 100×60×28 mm
- Battery operation, battery not standard (9V Block), AUTO-OFF function for battery conservation
- Net weight approx. 250 g

SAUTER Pictograms:

Adjusting program (CAL):

For quick setting of the balance's accuracy. External adjusting weight required.

Control outputs

(optocoupler, digital I/O):

to connect relays, signal lamps, valves, etc.

Rechargeable battery pack:

rechargeable set.

PEAK

Calibration block:

Peak hold function:

measuring process.

standard for adjusting or correcting the measuring device.

Analogue interface:

to connect a suitable peripheral device for analogue processing of the measurements.

Mains adapter:

230V/50Hz in standard version for EU. On request GB, AUS or USA version available.

Statistics:

using the saved values, the device calculates statistical data, such as average value, standard deviation etc.

Power supply:

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or USA on request.

Motorised drive:

The mechanical movement is carried out by a electric motor.

SCAN

Scan mode:

Push and Pull:

continuous capture and display of measurements.

capturing a peak value within a

PRINT

PC Software:

Printer:

to transfer the measurements from the device to a PC.

a printer can be connected to the

device to print out the measurements.

Motorised drive: The mechanical movement is carried out

by a synchronous motor (stepper).

DAkkS calibration possible:

is shown in days in the pictogram.

Length measurement:

and compression forces.

captures the geometric dimensions of a test object or the movement during a test process.

the measuring device can capture tension

GLP/ISO record keeping:

of measurements with date, time and serial number. Only with SAUTER printers.

Fast-Move:

the total length of travel can be covered by a single lever movement.

MEMORY

Focus function:

Internal memory:

to save measurements

in the device memory.

increases the measuring accuracy of a device within a defined measuring range.

Measuring units:

Weighing units can be switched to e.g. non-metric at the touch of a key. Please refer to website for more details.

Measuring with tolerance range

(limit-setting function): Upper and lower limiting can be programmed individually. The process is supported by an audible or visual signal, see the relevant model

DAkkS

+3 DAYS

Factory calibration:

The time required for factory calibration is specified in the pictogram.

The time required for DAkkS calibration

Data interface RS-232:

bidirectional, for connection of printer and PC.

Resets the display to "0".

Package shipment:

The time required for internal shipping preparations is shown in days in the pictogram.

Pallet shipment:

The time required for internal shipping preparations is shown in days in the pictogram.

Data interface USB:

To connect the balance to a printer, PC or other peripheral devices.

Data interface Infrared:

To transfer data from the balance to a printer, PC or other peripheral devices.

Battery operation:

Ready for battery operation. The battery type is specified for each device.
