

Wireless Base Station with USB Interface in Industrial Enclosure

Introduction

The T24-BSue is one of a range of base stations that are required for configuration and calibration of the T24 modular telemetry system. Base stations can also be used for data collection systems by making available the T24 wireless transmitter data over the USB interface.

The data sent by transmitter modules can be utilised by multiple receivers such as displays, handheld readers, analogue outputs, relay modules and computer interfaces. Receivers support common industrial power supplies and are available in robust IP rated enclosures with internal antennas optimised to give outstanding coverage. The T24-BSue is housed in an IP67 enclosure and has better coverage than the T24-BSu.

On Windows PCs the free T24 Toolkit is used to configure and calibrate the T24 modular telemetry system while the free T24 logging and visualisation software allows monitoring and data collection.

Product Features

- Up to 800 m (2.600 ft) range
- Simple plug & play USF
- Configure & calibrate the T24 range
- IP67 / NEMA 4 rated enclosure

T24 System Overview

T24 Wireless Telemetry Sensor System is a modular wireless solution for industrial sensor applications.

High accuracy, high quality measurement is interfaced with simplyet powerful configuration and monitoring software.

Specifications

Power Supply	
Power supply voltage (USB)	4.875 to 5.125 Vdc*
* As defined by USB 2.0 specification	

Radio	
Radio type	Licence exempt
	transceiver
Radio frequency	2.4 GHz
Transmit power	10 mW
Range	Up to 800 m

Environmental	
Operating temperature range	-20 to 55 °C
Storage temperature range	-40 to 85 °C
Maximum humidity	95% non-
	condensing
IP rating (excluding USB connector)	IP67/Nema4

Mechanical

Flactrical

Order Codes

T24-BSue

Wireless base station with USB interface for computer connection in IP67 enclosure
